Your Frictionless Passage to Drupal 10!

A CMS migration or upgrade is the best way to improve performance of your apps and websites. Now, with Drupal 7 and 9 nearing the end of their life, learn why you should plan for Drupal 10 migration.

WHAT'S THE BUZZ ALL ABOUT?

**DRUPAL 7/9
SUPPORT
ENDS IN
NOVEMBER 2023.**

**PORTING OF
PROJECTS FROM
D9 TO 10
HAS BEGUN.**

**DRUPAL 10
HAS BEEN
LAUNCHED IN
DECEMBER 2022.**

No Drupal
community
support for D9
and lower

Website
vulnerable
to attacks

**WHAT DOES
THIS MEAN
FOR YOUR
BUSINESS?**

Outdated
editorial
experience

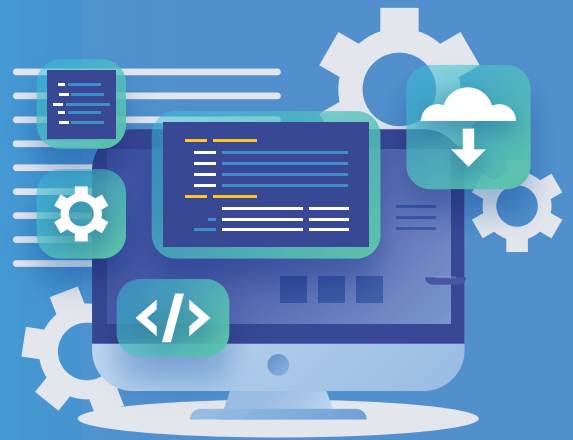

Stunted
business
continuity

DRUPAL 10 THE NEW CMS SAVIOR

Symfony 4, PHP7, and CKEditor 4 are reaching their end of lives, making websites on D9 vulnerable. D10 is here to save the day.

Use this time to walk and migrate, not hop in rush and upgrade!

WHAT DO YOU GET WHEN YOU MIGRATE TO DRUPAL 10?

Clean codebase & enhanced security*

Exceptional editorial experience*

Easy customizations with Decoupled Menus

*As part of Drupal 10 migration, you need to upgrade Symfony, PHP, and CKEditor to the latest versions.

WITH THE NEW POWERFUL DRUPAL 10, COMES GREATER CMS EXPERIENCES

Olivero - the simple and default Drupal front end theme instead of Bartik

Claro - the new clean, accessible, and powerful core admin theme

New Starter Kit Theme Generator allows developers to easily create new themes

Improved CKEditor5 offers a contemporary and collaborative authoring experience

Decoupled Menus with JSON linkset enables managing menus with minimal developer dependence

Automatic Updates Module allows users to manage updates automatically

YOUR STEPS TO MOVE TO DRUPAL 10

**IF YOU'RE ON
DRUPAL 7:**

Re-platform to D9,
start now!

**IF YOU'RE ON
DRUPAL 8:**

Migrate without
major overhaul

**IF YOU'RE ON
DRUPAL 9:**

Update custom
codes

SRIJAN'S PUSH FOR D10 READINESS CHECKS

It makes business sense to be aware of your website readiness and its current 'future-ready' capability. This is especially important as CMSes have to continuously evolve to be at par with newer systems. Looking at the bigger picture, a D10 Readiness check is imperative. That's exactly when Srijan comes to your rescue.

We are globally renowned for our Drupal expertise, which makes us well-positioned to evaluate your Drupal readiness. We propose a free Drupal 10 Readiness Check through our in-depth Evaluation Framework.

SRIJAN'S DRUPAL EVALUATION FRAMEWORK

Srijan's Evaluation Framework is built to systematically perform Drupal health checks and gauge website readiness. We ensure a thorough evaluation by conforming to the high standards set by our framework. This is how the process works:

1 Preliminary Checks

Our Drupal experts at Srijan will run preliminary checks to understand your website's overall health and functioning capabilities.

2 Website Audit

A site audit of contributed modules helps us engage better with your website. Contributed modules define many Drupal 7 and 9 content types, so checking for them and installing the same modules on Drupal 10 is our goal.

3 Custom Code Analysis

Checking your Drupal code against recommended coding standards and best practices is essential to our process. Custom code inspections allow us to know what to expect in terms of revisions and give an estimate of planning the migration process better.

4 Security Review

A security review is an integral part of the evaluation process. Automated testing to ensure that your website is secure against external attacks enables us to understand its Drupal 10 readiness.

Review

5 Report Analysis

Based on the checks that are run and the readiness assessment, we furnish a Performance Analysis Report that mentions all our findings and analysis on the category of risk your website falls under; High, Medium, or Low.

6 Drupal 10 Assessment

Assessing which existing modules are available on Drupal 10 and which modules need to be changed can help you clearly understand the migration process.

Srijan's Drupal experts run interference and draft an end-to-end Drupal migration plan, which begins from Drupal 10 Readiness for your website. Since the goal is to upgrade to the newer and snappier version of Drupal, analytical planning lays the groundwork for the migration process.
